# Self-Study

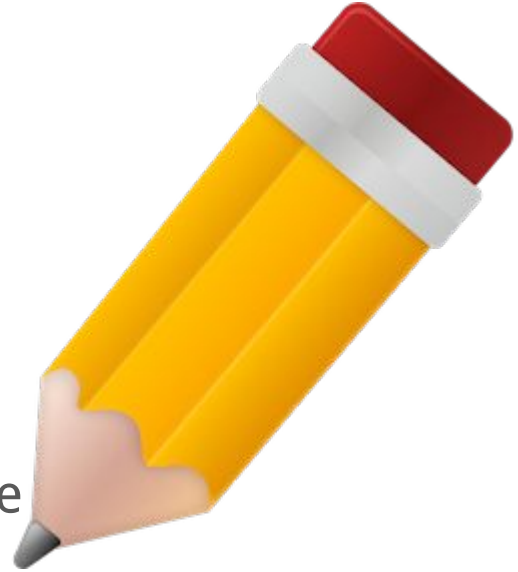

Over reading week you should revise the chapters we have covered so far.

Then attempt to answer the questions for each of the chapters covered from Preamble to Chapter 5.

It's important to go over the answers to satisfy yourself that you know them.

Backtrack any answers you don't know by re-reading the chapter.

Ask me for clarification when you return if you are still having problems.

# Preamble SAQs

1. What is the significance Tom's Diner in your everyday life?
2. Why is Tom's Diner significant for the User Experience?
3. What properties of Tom's Diner makes it so significant?
4. Why does the significance of Tom's Diner represent 'Good' science?

# Ch 1 SAQs

1. What is the key focus of HCI?
2. What is the purpose of the UX specialist?
3. What is User Experience and how is it applied?
4. If there are no 100% correct answers in UX, how do we decide what is right and what is wrong?
5. What are the five key properties of UX?

# Ch 2 SAQs

1. What are the relationships between the development methodologies discussed, which is best for UX and why?
2. Given need to rapidly create an interface prototype, which agile method would you use and why?
3. What's wrong with Cowboy Coding?
4. What is the separation of Concerns and why is it important?
5. Windows Toolkits are often specific to the Windows Manager, how can you more efficiently design for multiple Windows Managers?

# Ch 3 SAQs

1. Pick one input modality and describe it.
2. What are the four main sensory channels, and briefly explain them?
3. How does UX relate to previous Human Factors work?
4. What does Affective Computing mean?
5. Describe the differences between Gestural Interfaces and Touch Gestures.

# Ch 4 SAQs
